WORK EXPERIENCE

OLR

Customer Success/ Delivery Manager

Aug. 2023 - Present

Porto, PT

- Act as the bridge between clients, business teams, and technical teams, ensuring the delivery of the agreed service and customer success
- Responsible for leading a globally based cross-functional team, focusing on the planning and execution of project goals and team performance.
- Responsible for SLAs (Service Level Agreements) for monitoring, achievement and reporting.
- Overall management of customers' ticket queues for Incidents, Problems and Change Requests using ITIL (Information Technology Infrastructure Library) best practices.
- Management and co-ordination of the releases' schedule with the team.
- Define timelines, scope, deliverables, and ensure execution against them.
- Review and approve invoices, revenue adjustments, contract amendments and time entries.
- Responsible for monitoring costs and maintaining project margins in line with corporate financial objectives.
- Create reports and presentations (e.g.: steering committee, governance meetings, status updates) to customers and C-level executives.
- Identify potential risks, continuous improvement initiatives, create mitigation plans and resolve blockers.

Microsoft

Customer Success and Support Engineer

Jun. 2022 - Jul. 2023

Lisbon, PT

- Investigation, troubleshooting and solving customer functional and technical issues (deployment and/or installation).
- Customer advisement, collaborating between and across teams.
- Knowledge sharing through readiness programs, technical coaching and mentoring of others.
- Engaging with Microsoft Engineering/Supportability teams to investigate potential product defects and help drive Microsoft product improvements
- Use technology insights to help shape strategy when engaging with customers, partners, and teams.
- Act as an advisor to the product group/ engineering teams in order to support process improvements.

Oracle

Technical Consultant

Aug. 2018 – Jun. 2022

Porto, PT

- Developed custom solutions for Oracle products in the Retail business area.
- Utilized Oracle technologies and frameworks such as Java Webservices, Oracle ADF, PL/SQL and Unix/Korn shell.

- Involved in all phases of customizations for a retail system (Oracle Retail Merchandising System) and integrators.
 - Implementation, including design, development, testing, bug fixing, documentation and support (SIT and UAT).
- Gained experience in consulting and configuration work, particularly with predictive applications

EDUCATION

ISEP (School of Engineering of Polytechnic Institute in Porto)

Bachelor's in informatics Engineering

Porto, PT

- Design and development of software, information systems, network administration, security and data processing.
- Computer Engineering in ISEP was the first degree in Portugal distinguished with the EUR-ACE quality certification from the Order of Engineers, recognized throughout Europe, Latin America and Asia. It is the only institution in Portugal that is a member of the CDIO framework consortium, created by MIT.
- Internship Grade working for Oracle: 17.0 out of 20.0
